

Creating Videos using Claude Code

Source: swap.notion.site/Creating-Videos-using-Claude-Code

Remotion is React for video. You can version control it, automate it, generate it from data, and scale it infinitely. One template can produce thousands of personalized videos. Change a single variable, re-render, and you've got a completely different video with zero manual editing.

Getting started

```
npx create-video@latest my-first-video --template=blank
cd my-first-video

npm i
npx skills add remotion-dev/skills
npx remotion studio
```

Try these prompts (then click Render to save as MP4)

1. Create a simple test composition. Just make white text that says 'Hello World' fade in smoothly from the start. Black background. Make it feel clean and simple. → [HelloWorld.mp4](#)
2. Make a title that says 'LAUNCH DAY' in bold white text. It should feel substantial, like it has real weight. Make it start small and grow into place with a satisfying bounce, like something heavy but elastic landing. Not a quick bounce, more like a deliberate settle. Make it feel premium and confident. Black background. → [MyComp.mp4](#)
3. Create a video with three text elements that appear one after another:
 - First: 'INTRODUCING' fades in at the start
 - Second: 'THE FUTURE' appears after the first one finishes, with a bouncy entrance
 - Third: 'OF DESIGN' slides in from the left after the second oneMake each transition feel natural, not rushed. → [Intro.mp4](#)
4. I'm going to place a file called logo.png in the public/ folder. Add it to the video centered at the top. Make it fade in smoothly with a subtle scale effect, like it's gently appearing. Use the Remotion Img component so it waits for the image to load before rendering. → [Intro.mp4](#)
5. Make the logo bigger. → [Intro.mp4](#)

6. Even bigger! → [Intro.mp4](#)
7. Add background music from public/music.mp3. Also create a simple audio visualization at the bottom of the screen. Make bars that pulse with the beat. They should feel energetic and respond strongly to bass. → [Intro.mp4](#)
8. First Time Speakers Marketing Video (see full PROMPT below) → [FirstTimeSpeakers.mp4](#)

PROMPT — First Time Speakers Marketing Video

Create a premium, emotionally engaging 60-second marketing video for "First Time Speakers".

STYLE:

Modern startup aesthetic, cinematic motion graphics, Apple-level polish, clean typography, subtle gradients, dynamic transitions, inspiring soundtrack, fast-paced but emotional.

TARGET AUDIENCE:

Developers, engineers, designers, product managers, tech professionals who want to speak publicly but are afraid, inexperienced, or suffering from imposter syndrome.

OPENING (0-8s)

Visual:

Dark screen.

Cursor blinking.

Someone typing and deleting a conference CFP application.

Text:

"Ever wanted to give a tech talk..."

Pause.

"...but never submitted?"

Show:

Delete. Delete. Delete.

Voiceover:

"You know something valuable. But hitting 'submit' feels terrifying."

TRANSITION

Quick cuts:

Conference stage.

Audience.

Person nervous backstage.

Heart rate animation.

Text:

"What if your first talk didn't need to be perfect?"

MIDDLE (8-30s)

Visual:

Bright transition.

Supportive community scenes.

Virtual event clips.

People smiling.

Chat messages appearing.

Text sequence:

"No experience needed."

"Just 5 minutes."

"Supportive audience."

"Zero judgment."

Voiceover:

"First Time Speakers exists for people giving their very first tech talk. No pressure. No expertise requirements. Just a welcoming community ready to hear your story."

Show:

Micro-interactions.

Application form UI.

Friendly reactions.

Applause.

PAIN POINT SECTION (30-45s)

Split screen.

Left:

Thought bubbles:

"I'm not an expert."

"What if I mess up?"

"Someone else knows more."

Right:

Talk clips.

Audience nodding.

Positive reactions.

Text:

"The tech community needs more voices."

Voiceover:

"The best talks aren't from celebrities. They're from people willing to share what they've learned."

EMOTIONAL PEAK (45-55s)

Visual:

Speaker steps onto stage.

Lights come up.

Audience smiling.

Slow motion moment.

Text:

"Your first talk could inspire someone."

Voiceover:

"One five-minute talk can change your confidence forever."

CTA (55-60s)

Bright brand screen.

Logo:

FIRST TIME SPEAKERS

Text:

"Give your first tech talk."

"Apply now."

Button animation:

Apply to Speak →

Footer:

firsttimespeakers.com

Voiceover:

"Your voice matters. Apply today."

MOTION DESIGN NOTES:

- Smooth camera pushes
- Dynamic typography
- Floating UI cards
- Soft particle effects
- Modern tech conference aesthetic
- Diverse speakers
- High contrast accessibility
- Vertical 9:16 format
- Captions burned in

MOOD:

Encouraging, empowering, safe, optimistic.

GOAL:

Maximize speaker applications from people who have never spoken before.

Assets

- **LOGO** (preferred unless you have a good reason otherwise): `512x512.png` (attached on the Notion page)
- **MUSIC** (or pick your own / trending track): `bensound-badass.mp3` (attached on the Notion page)

The Mission

💡 Your mission, should you choose to accept it, is to create a 30-second video using Remotion talking about the content on the website firsttimespeakers.com with the final CTA being "Apply to Speak". It might take a few minutes to Render the final output (depending on your machine's RAM).

Once done, tag Swapnil while sharing it on socials. [LinkedIn](#) / [Instagram](#) / [Twitter](#) (deadline: 24 hours, don't overthink, just get started, that's the best way to learn!)
